President's Corner

Spring. A special time of newness and renewal. Yet, I must admit that as a youngster I was annoyed by "older people" that complained of time passing and seasons arriving too quickly. I vowed to never let my complaints of time make me *sound* old. Well, guess what, Debi?

There is no stopping Mother Nature. She marches right along. So perhaps I can pacify my getting old self esteem with qualifying myself as wise as well?

Even though spring seems to have arrived abruptly I'm enjoying signs that it is here. First, of course, the performances of spectacular rhodies, fresh growth on my perennials, lawn and "Extravaganza" collection. Additionally, the sounds of frogs announcing they're "falling in love", days getting longer with more frequent sun breaks and warmer temperatures. Yes, newness and renewal.

Be sure to take a few minutes this month to listen to the frogs, watch the birds, tidy up your emerging Extravaganza divisions and enjoy the signs of spring that take place during April. It's all part of the rewards of gardening.

. . . SMJ Work Party

This month we are weeding and planting 40 geraniums at the Shelton-McMurphey-Johnson House on Thursday, April 27, at 11:00 a.m. Maybe we might have lunch together after.

Plant Nerd Night A Success . . .

Sharon Blade

Another year....another NEW PLANT! Yea! Plant "Nerd" Night happened, with a full house. This was a really good evening...didn't you just love it?

The program was interesting with lots of neat plants and a great job by the presenters of connecting with the audience. We were lucky to have such great nursery people this year.

But IT only happened with the overwhelming commitment and dedication from Garden Club Members. Thank you all. You were great and your work is appreciated.

Garden Club's Nerd Night Reps -- Camille Noel, Mary Bromley, and Kathleen Gray, did a good job of taking care of our nursery folks for the evening. These members do a lot of ground work and preparation to make sure that Nerd Night is a success. Finet introductions gals. And we are not forgetting Terrye Eames, who did a great ground work prior to Nerd Night, but unfortunately fell ill the morning of Nerd Night...she missed all of the fun. Hope she is feeling better! Her work is appreciated.

Thank you to Pat Kramer and her crew for keeping our nursery people and garden members from being hungry. Pat, you are a keeper.

Also....did you see all of those red tickets in the fish bowl? Well, that was due to the effort of Lucy Chambers and Sherry Cossey. Those two know how to sell.

So that leaves all the rest of you...set up crew, clean up crew, cookie crew and buying crew. And one last person to thank, dear Dorothy Cruickshank, who always keeps Nerd Night fun and entertaining. Let's all thank her for her good work....she could use all of our support this year. So here's to another Plant "Nerd" Night...now where do I plant those plants?

Sister Janet Marcisz and Dorothy Cruickshank getting ready for Plant Nerd Night, with Kathleen Gray in the background.

Garden Extravaganza To Be Held

Plant Sale Workers Needed

EGC Plant Sale Chairman, Camille Noel, will have sign-up sheets at our April 18 meeting for helpers, tables, and canopies. Plan to add your name. Pick up some flyers to distribute to groups and friends.

The Garden Extravaganza is sponsored by Willamette District Garden Clubs and Lane County Dahlia Society at the Key Bank parking lot on River Road next to BiMart on Saturday, May 13, 10:00 a.m. – 4:00 p.m.

Set up, sale, and tear down all occur on that Saturday! Plan to arrive at 8:00 a.m. for set-up and 8:30 for bringing in your plants. Bring your own plants. Use the BiMart parking lot. A small committee will price the plants as they arrive with the red EGC tags. Treasurer Jenifer Rabner will be our head cashier for the Willamette District Clubs.

Lane Forest Products donated a yard of planting mix that Janet Calvert picked up. There are pots and soil in the garbage cans behind the clubhouse.

Call Janet if you need pots and/or soil.
541.686.2697, jankcalvert@comcast.net.

Good looking plants attract the most attention and sell first! It is wonderful if you have your plants' common and botanical names as well as preferred growing conditions to mark on the white tags (use #2 pencil.) Tags are available at the garden club meeting next week.

It's a great idea to have a picture of the plant when it is at its peak to help buyers know what they are purchasing. Use seed catalogs or go online to find color photos. Customers like to know what color the flowers are going to be too.

In Case of Fire

Dianne Dewey, Building Maintenance Chairman

There are two fire extinguishers in the Eugene Garden Club house. One is in the workroom hanging on the cabinet where we hang tools across from the furnace by the door into the big room with the hard floor surface. The second one is in the kitchen hanging on the wall to the right of the microwave and to the left of the door into the carpeted room.

These devices are only meant for small fires in their very beginning stages. Anything bigger and you should get out while you can and call 911. If you choose to use one, be certain you have an escape route behind you.

To use a fire extinguisher correctly, experts say that one should remember the acronym **P.A.S.S.**

(Pull, Aim, Squeeze, Sweep)

1. Lift the extinguisher off the wall and hold with the top red handle,
2. quickly yank on the red plastic tie to break it and
3. **PULL** out the pin.
4. **AIM** hose at the base of the fire. (Check for means of escape)
5. **SQUEEZE** lower red operating handle while holding black hose.
6. **SWEEP** hose from side to side to completely extinguish the fire. (Determine if 911 should be called)

Watch for re-igniting.
Repeat as necessary.
Have site inspected by
fire department.

Dianne Dewey, Building Maintenance Chairman, demonstrates usage of a fire extinguisher at EGC Board meeting.

June EGC Meeting Change

The June 20th Eugene Garden Club Membership Meeting and Installation of Officers will be held at the Camas Country Mill this year. The address is 91948 Purkerson Road, Junction City.

We will be served lunch and have our meeting in an original school house building which has been placed near the Bakery Store. Lunch will cost each member between \$10 and \$12.00 (to be decided after we have a member participation count).

The Camas County Mill is a quaint lovely place, and the bakery sells flour, breads, etc. Check out their Website www.camascountrymill.com.

A history talk about the school house and the Mill will also be given. This should be a fun way to end our year.

For those that need a ride, we can carpool from the Garden Club or you may perhaps do your own carpool from your homes.

REMEMBER that we will be required to sign up, as an accurate count must be made. A sign up sheet will be available at the April and May meetings or you may email/or call Sharon Blade. sljdblade@comcast.net or 541-688-6592.

MORE INS & OUTS OF THE EUGENE GARDEN CLUB

. . . Flower Arranging Class

Moved to the 4th Thursday this month, April 27, 1:30 p.m. The assignment is either a Parallel Design or a Design using 3 Containers.

. . . Pacific Convention

Sherry Cossey, Sharon Wilson, and Georgia Zahar are traveling to Seattle April 18-20 for the Pacific Region Garden Clubs Convention

*Tulips and euphorbia
in very early April! To
accompany all the
gorgeous daffodils.*

April in the Garden

Juanita Manley, Horticulture Chairman

The sun is shining, but it doesn't feel like spring. Which tells me that it is still too early to put new summer plants outside or in the ground. Better to fertilize all the outdoor plants growing in pots. If they need a larger container or some refreshing new soil, now is the time to do it. And if there are extra divisions left, pot them up for the Plant Extravaganza.

Continue to plant bare root and potted trees, shrubs, vines and roses.

The slugs are so thick that they are climbing up the daffodils and eating the entire bloom. I have not had to put slug bait around the daffodils before.

If you saw much leaf curling and discoloring on your dogwood last summer treat with fungicide as buds swell and new leaves appear.

I am interested in hearing how the starts from our March meeting are doing. I was blown away with the enthusiasm of the group resulting in my not giving enough information. Give me a call or email if I can further assist you in trying again.

The turkeys have been visiting my yard regularly and I watched one day as one of them plucked the heads off the daffodils and spit them out. I hope she remembers their foul taste.

*Some early blooming rhododendrons include Taurus – above
G.W. Leak – below.*

Puget Sound's Oldest Orca Missing and Presumed Dead

Georgia Zahar, Birds & Wildlife Chairman

According to a recent article in the Register Guard, the oldest member of the small population of endangered Puget Sound orcas has been missing for months and is likely dead.

The orca labeled J2 and nicknamed 'Granny' had been spotted thousands of times over 40 years of orca surveys but has not been seen since October, according to the Center for Whale Research on San Juan Island.

She was typically seen at the head of the J pod, one of three family groups of whales that travel with their mothers or grandmothers, has not been spotted for some time. Other members of her family have been spotted and photographed.

Individual southern resident killer whales that spend time in the inland waters of Washington State are identified by unique black and white markings or variations in their fin shapes. Each whale is given an ID number and name.

A 1987 published study estimated that J2 was born in 1911, putting her age 105. There is a 12 year margin of error so she could be older or younger.

Despite a decade of research, protection and recovery efforts, the orcas continue to struggle. A lack of food, pollution and disturbances by marine vessels are a major factor. Orcas were listed as endangered in 2005.
